

## Maitsco Corporate Theme - Themes

NEWS\_PDF\_AUTHOR: mariane

NEWS\_PDF\_DATE: 2010/5/22 16:50:00

hello Xoopers,

based on the default theme in the 2.4.5 rc, I built my new theme "maitscocorporate". in this theme I used:

- CS3 to make curvy corners and shadows
- curvy jquery (<http://www.curvycorners.net>) to make the tables curvy (essentiel for IE because CS3 isn't validated by IE yet)
- S3Slider jquery effect , I took it from this link(<http://www.serie3.info/>)
- Quick edit/delete/ad for the block
- Avatar picture shown in the usermenu
- Links in Horizontal menu are highlighted accordingly to the module that you are browsing
- Few changes to the news module templates and for the system templates (search, siteclosed, redirect page)
- Footer divided on 4 parts easily editable from theme.html

due the incompatibility of IE with cs3,there is a few difference between the theme in IE and others browsers.

I hope you will like it.

[demo](#)

[download](#)

The theme is available also in arabic (rtl) and available for download in [arabxoops.com](http://arabxoops.com)

a big thanks for : Mowaffak (arabxoops), Kris (Kris\_fr); Nikita(from frxoops) and Tatane(from frxoops) for their precious helps, advices and test.
