Classifieds 2.52 released.

This is just bug-fix version.

Fixed the search not working properly, if you used a keyword and any other option (state/region, category or price range) the results were not right, it was ignoring the keyword.

Now the search works even if you don't use a keyword, just choose a state/region or category and you will get back results.
You can not just enter the price range, you must choose one other option (keyword, category or state/region).

Get the download HERE.

report any problems HERE.

Thanks,

John
