Xpayment 1.31

Modular Gateway and Modular Modules for Payment Transactions

Xpayment is a module that allows you to write customised payment gateways, as well as having modular hooking stratum in the module with a second plugin section for modules and responses to invoices.

Complete with Gateway plugins you can easily customise this module for your payment gateway in a few files. There is many benefits to using xpayment as the standard for intergrating payment into your modules. It has a modular plugin system for gateway invoice responses so your module will know when an items has been paid for.

This is the new standard for gateway and payment solutions with XOOPS.

We have a translation project underway this archive from time to time will be patched to include more languages. If you can lend a hand with translation ([Click Here](#)).

Some of the current features include:

- Fee Compensation
- Security Deposit
- Secure JSON Payment Button
- Email Permissions
- Gateway Permissions
- Diverse Modular Plugin
- Plugin Gateway systems
- Modular Plugin and Action hook
- Easy Form Post from any module
- Itemised invoicing
- Multicurrency
- Tax Itemisation

Payment Gateways Included:

- Paypal

- Zombaio
- CCBill
- 2Checkout.com

Bugs Fixed:

- Invoice Status not being marked Paidl
- Gateway Transaction Cursor Not being marked
- Mailer Fields being Specified
- Template Formating
