I have been used Xoops for my websites since 2005 now. This is my ninth site created with Xoops.

This site hosting longplays (walkthrough videos) of Commodore 64 games. The user can choose to download or watch the video on youtube.

I'm using the Bleek_Party theme with a few modifications. This theme works pretty well. But I think I will hire someone to make a more appropriate theme. Anyone?

The modules I use:

TDMDownloads
XDonations
Xoopspoll
Membership
CBB/NewBB
News
Smartfaq

The site was started just two weeks ago. So there is not much activity yet.
