Sports Pack (Football/Soccer, Cricket, Darts) converted to XOOPS 2.5.5 Admin GUI - Modules

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2013/3/10 7:50:00

zeroram recently suggested that we update our Sports Management modules 😃

So today we're making the first step: I've converted these three modules to XOOPS 2.5.5 Admin GUI, and tested under PHP 5.4.12.

The modules need more work in the sense that they are not using XOOPS API, and would have to be fully converted to "Blue Move", but for the time being it seems like they are doing the job.

But since you can now install and test them on XOOPS 2.5.5 and PHP 5.3/5.4, I hope that we'll have users who will want to work together on improving these modules, and converting them to XOOPS API.

So let me know if there is any interest in improving these modules any further.

Download:

CricketStats 1.20 Beta 1

MatchDart 1.60 Beta 1

TPL League Stats 1.10 Beta 2

Also, we've updated recently the **Team module**, for playing games on line, so you can test it as well:

- **Team 3.02 Beta 1**

Follow-up and discussion: in this thread
