I have just released Classifieds 2.53 RC1.

There are no new features except the admin has changed a bit.

It now uses the new module admin style. I also changed the way categories are listed in the admin. I did it the way Mamba did in my Jobs module. I want to thank Mamba for his work.

You can get the module **HERE**.

Please report any problems here.

Tested on:

Xoops - 2.5.5 PHP - 5.3.23 MYSQL - 5.1.68-cll Everything works fine for me.

Thank You,
