XOOPS ModuleInstaller 1.02 Beta 1 available for Testing (XOOPS 2.5.7 only) - XOOPS

NEWS_PDF_AUTHOR: Mamba

NEWS_PDF_DATE: 2014/7/29 11:00:00

If you are a XOOPS user and want to install several modules for testing, currently you need to install them one by one, which sometimes is quite frustrating, if there are many of them.

The same is for updating or uninstalling.

So we thought that we'll provide some help to you 😃

The latest version of Module Installer will help you to:

- install modules in bulk
- update modules in bulk
- uninstall modules in bulk

Please check out this video to see how easy it is now for XOOPS users:

https://www.youtube.com/watch?v=d7zW5oaQGbA

NOTE:

a) This modules is only for **XOOPS 2.5.7**

b) You will need to patch the Core by copying two files from the /extras folder to /modules/system/admin/modulesadmin

Therefore, this Beta version is only for developers and "power-users", who feel comfortable with testing Beta versions of software.

Download: **XOOPS File Repository on SourceForge**

Please provide feedback and report any issues in **this Forum**
