

New free theme wgCarservice - Themes

NEWS\_PDF\_AUTHOR: goffy

NEWS\_PDF\_DATE: 2016/2/14 18:50:00

Hello Xoops Users,  
I would like to present my latest theme!

wgCarservice is a theme for XOOPS (<http://www.xoops.org>)

- Full Responsive Theme
- OnePage-Design: each block area gets an own section and can be style individually
- developed with Bootstrap version 3

This theme is not developed for blogs or similar pages, it is primary for presentation of a company.

Online demo and download: <http://xoops.wedega.com>

Live demo: <http://buchner-service.de>

On this site I used only blocks to show the information.  
The position of the different blocks works as follow:

- Header
- Left Blocks
- Center Block left
- Center Block Center
- Center Block Right
- Blocks Right
- Content
- Bottom Blocks left | Bottom Blocks Center |Bottom Blocks Right

Used modules on this site:

- Xoops 2.5.7.2
- Publisher 1.02 RC
- Contact 2.23 (from <https://github.com/myxoops/contact> or wedega.com; this contact module supports showing contact form as a block)
- wgSiteNotice 1.24 (from xoops.wedega.com)
- wgTeams 1.03 (from xoops.wedega.com)

The pictures included in the theme are only for demo and the reuse of them is not allowed.
