I am currently in the process of building a Xoops website within the USA, the website is not functional as yet, and we are looking for some users to apply for tech help, moderators and possibly some admins.

Primary use of the Xoops website will be, technical issues, xoops downloads, news related to xoops and some scripting.

If interested please e-mail dean(at)fullaccess(dot)us or visit <http://www.xoops.fullaccess.us> and leave some information in the forums.

Thanks
