

Wmpdownloads module with English language files - Modules

NEWS\_PDF\_AUTHOR: brash

NEWS\_PDF\_DATE: 2003/10/14 13:19:02

Wmpdownloads is an adaption of the standard MyDownloads core xoops module, and is exactly the same except for one very different thing. Wmpdownloads allows you to set group permissions on a per category, per sub category and per file level basis. This permission functionality gives a great deal of control to the webmaster which was only previously available by running multiple installs of the MyDownloads module.

I have added the English language files for this module, but it also contains French, Simplified Chinese and Traditional Chinese. Have fun 🎉 !
