Peter Zeidman of IntranetJournal.com wrote a series of reviews on open source CMS's, the final review being about our own XOOPS 😃 A quote from the article:

'*Xoops is a truly out-of-the-box intranet solution and installation couldn't be easier, with database fields, file permissions and a user account set up automatically. Once installed, the design of the system is clean-looking and intuitive. It also differs from other systems with its object-oriented design, which simplifies programming and customization of Xoop's operation. This month I'll be giving you a rundown of Xoops's features, pros and cons, and comparing it with the packages already examined in this series.*'
