This module was modulated to Xoops 2 by melkahdor over at <http://www.xfactory-fr.net/>, and provides a means for visitors to easily link text, buttons, logos, banners and even news feeds from your site to their own.

I have added the english language files to the existing french ones, and have touched up a few things here and there in the index.php file. All you need do is download, install and replace the default images with your own. Download it from;
