

ArchSilver Theme For Xoops Ready for Testing. - Themes

NEWS_PDF_AUTHOR: AAINC

NEWS_PDF_DATE: 2003/11/9 11:49:46

The first theme I downloaded, after installing Xoops, was the Gold theme from <http://www.xoops-themes.com>. ArchSilver is based on that theme. The theme was originally a PHPNuke theme from <http://www.Disipal.net>, BlackW, that I modified into ArchBlackW. I converted the modified ArchBlackW into the Xoops theme ArchSilver.

It is a dark theme and has a Black/Gray/Silver color scheme. The them has turned out , IMHO, ten fold better than my modified Nuke theme.

[Screen shot](#)

NO REG REQUIRED FOR DOWNLOAD

You can view and download from:

<http://ArchangelArtifacts.com>

Please test on your site and if any problems occur, document the version of xoops, browser and OS versions.

Once testing is done I shall add some bells and whistles.

All that I ask is that you leave the footer credits intact. If you modify the theme add your credits in the footer.

PEACE
