Two extensible modules from Japan - Modules

NEWS_PDF_AUTHOR: GIJOE

NEWS_PDF_DATE: 2003/11/13 12:51:41

Two extensible modules only by adding plug-ins has been internationalized recently.

One is "BopComments".

This module offers a page & block that displays newly information on the entire site inclusively.
The recent version 0.6.1 of BopComments can output RSS too.

BopComments is surely useful for site visitors.

You can download from [Finalgear](#)

The other is "Extensible Waiting Block".
This module offers you an extensible waiting contents block into your XOOPS.

The original XOOPS block of "Waiting Contents" works only for official modules,
and is no longer extensible.
By installing this module and adding proper plug-ins only,
you as webmaster can confirm any approval waitings of any modules at one view.

ExtensibleWaitingBlock is surely useful for the webmaster.

The original version is made by Ryuji [Ryu's Planning](#) (Japanese site)
A hacked version by GIJOE is distributed on [PEAK XOOPS](#) (English site)

plug-ins included BopComments:
