Hi

I am very happy to announce the re-birth of the web site : <http://xoops-themes.org>

Where you can find many themes for Xoops V1 and Xoops V2 and tutorials

This web site is in French but it is built with the multilingual Xoops 2.0.5 (many thanks to Horacio...) and I am working about translations in english... tutorials and news first.

I am working for having a second forum in english.

In few days I kill the unixoops.org website..

and I give you appointment on [http://xoops-](http://xoops-themes.org)

[themes.org](http://xoops-themes.org)
