New Theme from PetitOOps

Dream On

It is the theme of the blue base to which being simple weariness does not come.

Autor: Haruka

#Although a request of creation is got also by the PM here these days, the theme creation by PM is not received.

The theme which I can create per day is at most one or two.

Though regrettable, I do not have the power which replies to all individual requests.

When there is a request, please write to the forum of PetitOOps.

As long as there is time, I want to create about the theme which can carry out general public presentation.
