Following a nice offer from the great people at <http://www.linux-gamers.net> I have moved my site for XOOPS modules for Clan management to a new place:

<http://modules.linux-gamers.net>

Other news:

Team Module v1.32 is in beta testing and will be released in the near future as v2.0 if no further bugs are found.

It features extensive use of SMARTY and Object Oriented programming and will be further expanded - development doesn't cease 😊

See you there
