Again a new version of TinyContent. So what are the new features?

Changelog:

- Printer friendly page
- Send2friend
- In wysiwyg mode, TinyContent detects the browser and automatically switches to the Xoops Editor if you aren't using IE 5.5 or above
- Bug fixed when disabling smilies
- code cleaning

The new version is available in the modules section on this site. If you were using TinyContent v1.4, simply overwrite the files and update the module!
