It's been a while, but I'm back working on Xoops Themes, trying to improve my Xoopsing skills 🙄

I've got 1 new theme in my downloads section at [montisarts.com](http://www.montisarts.com) and 3 more will follow soon. I called this one Gamespot because I tried to 'port' the gamespot.com theme to xoops. I did it just to challenge myself and give myself a Theming goal. I guess it worked out pretty well, if you wanna try it, go to <http://www.montisarts.com> and download it. You can also preview it in the theme selector.
