

Black Grey Theme - Themes

NEWS\_PDF\_AUTHOR: kevinv

NEWS\_PDF\_DATE: 2003/11/24 18:31:21

I've made my first theme available for download. It's just a simple modification of the default theme to change the colors to black and grey, oh and I removed the Mac/Netscape specific CSS sheets (Mac OS X browsers are better than IE at standards now) and added colors for the weBlog module.

You can see the theme in use at [vanhaaren.net](http://vanhaaren.net). Download is: [black grey download](#)
