PetitOOps made the trial product of a "avatar maker."

This can be registered as your user picture, combining a picture like a puzzle.

This adds the picture created directly to your user account.

The processing method of the picture which the guest created now is not established.

Therefore, when you do not log in, it prevents from having used it.

Since a site is Japanese, it may be incomprehensible, but LINK will be displayed if you log in.

It is displayed as [AVATAR MAKER] in the middle of the center block.

It is glad, if you tries and I have a report tell. 😊
