

testdriven.com uses xoops - YAXS

NEWS_PDF_AUTHOR: spiff

NEWS_PDF_DATE: 2004/1/23 0:33:01

testdriven.com has chosen the xoops CMS to provide the developer community with news and links to test-driven development (TDD), the central practice of eXtreme Programming. The site has been up since the end of March, 2003, and has recently added a backend syndication feature (RSS feed) for the Web links module.

Deep regards and thanks to the entire xoops team for their excellent work.
