Hello everybody.

After a "server crash" (I'll not going to explain what I think about my web hoster 🙄 ) all links to download modules were out of order onto 123rando.com.

All posts and registered users since the begining of the month are definitely losts.

Sorry for that!

Next time I'll not wait for any backup solution from my web hoster, I'll do everything by myself.

So, the real news...

I've resubmitted every modules (MS-Weather, News-Block) and more in the downloads section of this site.

I hope you will enjoy it.

Have a nice week end and don't forget...

**BACKUP...BACKUP!!** 😄 😊
