In my first little web page I put Xoops 2.0.6 translated into Italian Language (I used the file named xoops2\_it\_lang\_03.zip ) and then I put my first Xoops Guide about how to install Xoops (OFF LINE) with screenshot and wrote in italian language that works well on Explorer 6 and Nestascape 4.7.9 I hope this help.

You can find only them on <http://xoops.altervista.org>

(We aren't bravi we are enthusiastic)
