We are proud to report that the 3rd XOOPS conference was successfully held in Tokyo last weekend. It was official XOOPS event organized by XOOPS Japan Team. About 70 XOOPS users, developers and medias attended the meeting.

At the meeting, presenters introduces some case studies, how to design XOOPS site and how to hack XOOPS to improve usability. We confirm XOOPS is very useful to set up a website quickly.

[This is a report which was introduced on ITmedia](#) (former ZDNet Japan).
[The English translated version](#) by Babelfish.

XOOPS Japan team will continue to hold meetings to interchange our ideas and corporate to improve XOOPS in future. 😊

Former XOOPS conference in Japan:

1st Conference: June 1st 2003 at Shibuya, Tokyo

2nd Conference: September 13th at Shibuya, Tokyo.

Michael "Monty" Widenius, CTO and Co-founder of MySQL was attended!
