Agenda-X 2.0RC is just released, the new Agenda-X allows easy management of almost every possible combination of recurring events: daily, weekly, monthly, yearly, every N day(s), every other month, on the same day every month, on last sunday of every 2 months except on..., on 2nd monday of every month counting from the end but not on... etc, etc...

The attractive and popular Mini-calendar block is enhanced with easier random image display, just put your image files in a directory, and let Agenda-X show it!

The administration is now totally integrated, and "SMARTY themable"
