

3 for the Price of 1 - Modules

NEWS_PDF_AUTHOR: Anonymous

NEWS_PDF_DATE: 2004/3/19 9:35:53

I have just released three modules, these are either bugfixes or upgrades. The following module are as follows:

Spotlight V2.0 RC1 (RELEASE CANDIDATE, FOR TESTING END DEBUGGING PURPOSES)
WF-Channel
SPAW-Editor

You can download these modules from [the WF-Section website](#) and are available in zip and rar formats.

Also I will like to mention that the WF-Section website has re-opened to everyone.

Can you please report bugs found at the wf-section website.

Spotlight:

The Spotlight module can be used to 'spot' an article of special interest on your mainpage. It still is a block but as a central block it has the most value [even if Spotlight can be used as any normal block].

v2.0 RC1

- + Added/Changed: Recoded all of the admin area nearly 90%.
- + Added: Image upload area.
- + Added: Thumbnails for images.
- + Changed: Templates, still much work to be done on these, should be completed by full release.
- + Bugfixes: Many fixed, added many and fixed again.

NB: May not sound like many changes for the massive version jump, but you will understand why when you use it.

WF-Channel:

WF-Channel is a way of managing those pages of information that other modules just don't seem to fit. You can keep together those 'about Us', 'Refer a Friend', 'Link to Us', Privacy Statements or just about any type of information that you believe would benefit your users.

This module has had a major update and bugfix.

Spaw Editor:

This is a port of the excellent Spaw Wysiwyg editor converted for Xoops and will only work with IE v5.5+.

This version is mainly a bug fix Version that corrects some error within the previous version.
