Dear fellows Xoopsers !

As some of you were requesting it, I repackaged the XOOPS Multilanguage hack to correct a few bugs and, again, get more things multilingual ! 🙏

You can download version 1.2 here : [Zip Version \[177 KB\]](#)

**Again, please, read carefully the ReadMe.txt file as it is VERY IMPORTANT !**

Here is a list of changes since version 1.1 :

- In the Search function, the module names are now multilingual;
- The notification page is now completely multilingual;
- When a notification is sent to users, the name of the module from which the notification comes from is now multilingual;
- The title of the comments in the block Recent comments is now multilingual;
- The disclaimer message in the Registration form is now multilingual;
- Other few bugs that I can't remember.
