Tplleguestats RC1 released - Modules

NEWS_PDF_AUTHOR: ralf57

NEWS_PDF_DATE: 2004/3/31 6:40:40

Hi xoopers,
we(Mithrandir and I) have converted the script "tplleaguestats" into a module for Xoops system.
This module allows you to easily manage the league of your favourite team and show your
supporters detailed statistics on multiple seasons too.
We have released it as RC to put it under your test. (note: this means it is a testing vesion, not a
version ready for live websites and production environments!)
Actually only english and italian languages are available so,if you like it,please translate the lang
files into your language and we'll include them into the final version.

You can preview the working module hereand download it here
For support and other useful stuff see /docs folder inside.

All the best,ralf57 and Mithrandir.

Hi xoopers,
