

Wordbook has arrived! - Modules

NEWS\_PDF\_AUTHOR: hsalazar

NEWS\_PDF\_DATE: 2004/4/9 19:01:45

Fellow xoopers:

This is to announce you **Wordbook**. As you can surely guess from the name, Wordbook is a glossary module for your XOOPS site. It offers you the possibility of defining a single-category or a multiple-category glossary. It's Smarty templated. Has its own search function (and is XOOPS searchable too). I hope some of you can find in your sites a place for this little module. Pick your favorite flavor, install it and share with us your bug reports, ideas for improvement or comments.

[Wordbook v. 0.99 -- RAR version \[1,252 kb\]](#)

[Wordbook v. 0.99 -- ZIP version \[1,259 kb\]](#)

As you can see, this is a version 0.99 release. With your help, it'll be easy to spot and kill the remaining bugs, and then to release a bug-free version 1.0.

Cheers.
