Hi,

Xoops Digger is search engine for Xoops and another system, main features are:

- * Result Displayed by ranks
- * Total weighting control for part of documents (title,description...), whole documents and modules
- * Can index document content
- * Search can be limited to some modules
- * Common words exclusion
- * Display fully customisable through theme layout

Please come and see us at <http://xoopsdigger.sourceforge.net>

Please pay attention that XoopsDigger is still in alpha release and may contain some bugs...
