

TheatrePort Launches new look-theme - Themes

NEWS_PDF_AUTHOR: DobePhat

NEWS_PDF_DATE: 2004/4/26 15:40:52

Although it seems our users want to stick with a percentage width. We thought we'd share our new look with everyone at xoops! Our team has worked hard in adding various elements such as a Fixed width, A dynamic Drop down menu that is semi-xbrowser..and a neat graphical look.

TheatrePort-An online Performing arts website powered by xoops engine.

The new theme: is an 800 width theme and is influenced by...the old nautisOX, 7dana styles, x2T structures, the default theme and several others.

[b]The Menu{/b] The menu system is what we spent a lot of time working on...it's a dynamic drop down menu...and SEEMS to have been tweaked to work x-browser (testers appreciated).

The menu comes from Dynamic Drive and is heavily modified and seems to be working well!

[b]Graphics[/] Were submitted by a member.

Still working on ways to make it faster...

Percentage vs fixed width is always up for discussion...

Your suggestions on improving the theme are most helpful!

Thank you all!
