## (part of) Argentina's Free Software Comunity is using XOOPS - YAXS

Posted by: tromaes

I migrated three websites to XOOPS in the last couple of months:

- LUGAr - Linux Users Group Argentina (<http://www.linux.org.ar>)
- CaFeLUG - Capital Federal GNU/Linux Users Group (<http://www.cafelug.org.ar>)
- USUARIA's 1st. Free Software Congress - (<http://www.softlibre.org.ar>)

Thought of publishing it here in order to encourage developers on keep on writing code.

Thanks!
