

3 Modules for Public Release - Modules

NEWS_PDF_AUTHOR: dyoo78

NEWS_PDF_DATE: 2004/5/6 20:49:04

Hello Fellow Xoopsers,

The CalFacts Student Portal Working Group is proud to announce 3 modules (1 theme) for public release. Each module was made specific to our needs and there may be some bugs, but all in all, they look promising. Here's the list of the modules and links to download:

Tab Mod

The Tab Mod was created to be used in conjunction with the ucerkeley_liquid theme. It allows webmasters to easily deploy a site based on tabs and sub-tabs (like apple.com). Webmasters can hide the Main Menu block in entirety.

* Download the [Tab Mod](#).

Text Message Sender

TM Sender is a module that allows users to send text messages to other users' cell phones. This is a simple module, but can be powerful in conjunction with other modules. It currently supports Sprint, AT&T and T-Mobile. Nextel, Verizon and Cingular are on our to do list (verizon is reorganizing their text message function, so adding verizon may take some time).

* Download the [Text Message Sender](#).

Course Review

The Course Review Module is a module that allows users to rank and review courses and professors in a university/college setting. It can be replicated to be a cell phone review module, education abroad review module, or other review modules that have 2-tier categorization (i.e. cell phone and cell phone carriers, courses and professors, country and university within a country).

* Download the [Course Review](#).

All these modules are brought to you by the generous funding and volunteer work of the Students of the University of California, Berkeley and the CalFacts Student Portal Working Group.

Cheers,

-d
