For the past months, Hervet and I have been hard at work at giving the News module a facelift and today we are proud to announce the release of [News 1.2 Release Candidate](#)

Read the upgrade textfile included for instructions on how to upgrade.

Changelog:

- > Added ALT+S as submit option (include/storyform.inc.php, admin/storyform.inc.php)
- > Fixed warning about invalid index "anonpost" in submit form (include/storyform.inc.php)
- > Changed \$HTTP_GET_VARS to \$_GET and \$HTTP_POST_VARS to \$_POST

- > Added per-usergroup permissions for viewing, submitting and approving newsstories per topic
- > Full articles only viewable to users with view permissions to that topic
- > Added moderation block for approving/editing submitted articles outside the administration area
- > Added toggle to show only news from view-permitted topics on main page view

- > Added By Topic view on main page
- > Added Column view on main page - for old (Classic) view and for By Topic view

- > Added block for viewing top-level topics listed - toggle for only view-permitted topics in block preferences
- > Added block with recent/top news for one or more topics

- > Changed submit form to depend on approve/submit permissions with both info and extended text areas available to approvers only
- > Changed submit form from administration area to use same form as from main menu
- > Added upload to submit form
- > Added upload to topic creation form
