

For Xoops/Atmosphere users - Modules

NEWS_PDF_AUTHOR: atmoloq

NEWS_PDF_DATE: 2004/5/22 8:06:02

I created a new module (homeworld) that will allow you to display your Atmosphere Scenes in your Xoops site on the center pannel.

Since I started using Xoops and having created an atmosphere community site powered by Xoops 2. ,I had searched for a way to be able to display an Atmosphere Scene inside Xoops, having links to load html with embedded scenes was very unappealing. After much search for the appropriate way of solving this , I was able to create this , get it here. <http://www.tricosian.com/trixoops/modules/mydownloads/>

Please feel free to use and give comments.
