Today I released a new module called Dictionary for XOOPS. This module was converted by me from the original one developed for PHP-Nuke. All dictionary entries are stored in database and derived from "[The Online Plain Text English Dictionary \(OPTED\)](#)", a public domain English word list dictionary, based on the public domain portion of "The Project Gutenberg Etext of Webster's Unabridged Dictionary" which is in turn based on the 1913 US Webster's Unabridged Dictionary.

You can preview the module [here](#), or download it [here](#).

Have fun!
