Bugs are resolved, mainly there is one inconvenience remaining with news items not being shown in Classic view, but a clearing of templates_c folder content should take care of that.

We hope you like it and will use it as much as the previous version and that you will support the further development with more of your great ideas and comments.

[Get it on dev.xoops.org](http://dev.xoops.org)

The groupper.php file included in the release (not in the .zip, but the release on dev.xoops.org) is the file from Xoops 2.0.7 which is to replace modules/system/admin/groupper.php in Xoops 2.0.6 in order to make the group permissions work.
