We started developing our site in January. You can view it over at <http://www.power-dreams.com>.

It's a site about PC's, Modding, Zeta/BeOS and our Community.

We use the following Modules:

-> 3 News Modules

We cloned the News Module twiced, to have the separate News Columnne

-> 2 Headline Modules

So we can give our user's separate Headline News (you can find one in the PC & Modding section and one in the BeOS Usergroup Section)

-> yDownloads

-> myLinks

-> directsfriends[u]

-> [u]estadisticas

It's a spanish Statics Module, we did a little hacking on it so we have Statics for alle 3 News Modules. We translated it into german.

-> frozen-bubble

-> incBlocks

-> 2 myalbum-p

One album we use as our Case Gallery and in the second album users can put in pictures or wallpapers and so on.

-> NewBB 1.03

-> PiCal

-> Spotlight 2.0

-> myTutorials

-> wfsection

and many more

You can see we did a lot of work on the site, [here](#). You can visit our Site and we hope you will enjoy it!
