

XOOPS 2.0.7 released - XOOPS

NEWS\_PDF\_AUTHOR: skalpa

NEWS\_PDF\_DATE: 2004/6/15 21:29:00

The XOOPS Core Development Team is pleased to announce the release of XOOPS 2.0.7. This is mainly a "bug fix" release which addresses numerous issues reported since 2.0.6, and includes **two important security related fixes**. Therefore it is highly recommended that all 2.0.X users upgrade to this version.

The release packages can be downloaded from the sourceforge servers:

- [XOOPS 2.0.7 full package](#).
- [XOOPS 2.0.6 --> 2.0.7 update](#).

This is the re-release of the 2.0.7 package. Those who already upgraded to 2.0.7 before need only to update include/common.php and add the html/upgrade/xoops\_206\_to\_207.php file.

### !!EXTRA UPGRADE INSTRUCTIONS!!

Please apply the patch as usual, overwriting the original files with the ones from the patch. Please use your FTP application to make the mainfile.php file in your site root folder temporarily writable (chmod 777). Point your browser to [http://www.yoursite.com/upgrade/xoops\\_206\\_to\\_207.php](http://www.yoursite.com/upgrade/xoops_206_to_207.php), and follow the instructions. When the upgrade of mainfile.php is done, please chmod mainfile.php back to 644 or 444, and remove the upgrade/xoops\_206\_to\_207.php file from your server.

I'd like to dedicate this release, in the name of all the core developers and the leaders of the different XOOPS teams, to Herko's work and dedication to this project.

Several people have played an important role in the recent Xoops project reorganization, and the switch from a still almost monolithic development method to a more open one wouldn't have been possible without them. But the energy and time this man has offered have been the main ingredient. It's what created links between everybody and made the magic appear:

**in the name of all, thanks a lot my friend.**

A big thanks also to the members of our japanese community and specially to tom\_g3x and gijoe, who contributed a lot of bug reports/patches here and have shown themselves quite helpful in the making of this version.

Have fun... 😊

ChangeLog (contributed changes are marked coredev/contributor)

-----  
SECURITY FIX !! preventing code injection in media uploader (skalpa)  
SECURITY FIX !! preventing execution of external scripts in shared environments  
(skalpa/ackbarr)

Fixed bug #963937: Typo in modules/system/admin/findusers/main.php (mithrandir/tom\_g3x)  
Fixed typo in x2t theme css colteaser class definition (w4z004)  
Set formButton class to Xoops popups buttons (w4z004)  
Fixed bug #960970: Incorrect display of the graphical pagenav (w4z004)  
Modified the Word Censoring fix (#962025) for MySQL 4.x compat (skalpa + quick thx 2 hervet  
4 help)  
Ensured page title and slogan are escaped for HTML (Onokazu)  
Fixed bug #961565: Search form keywords not checked by JS (mithrandir/tom\_g3x)  
Fixed bug #961118 in XoopsFormElementTray::getElements() (mithrandir/luckec)  
Fixed bug #961311: Incorrect definition of headers var in XoopsMailer class  
(mithrandir/tom\_g3x)  
XoopsForm::assign() now indexes elements by name if possible (mithrandir/kerkness)  
Fixed bug #963197: xoopsHiddenText is hardcoded in formdhtmlarea (mithrandir/tom\_g3x)  
Fixed bug #963301: XoopsMediaUploader checkMaxHeight() doesn't work (skalpa/Onokazu)  
Fixed bug #963327: XoopsImageHandler delete() keeps rows in imagebody table  
(skalpa/tom\_g3x)  
Fixed bug #962025: Word censoring can mess db config options up (skalpa/tom\_g3x)  
Fixed bug #961313: XoopsMailer custom headers are duplicated (skalpa/tom\_g3x)  
Fixed bug #960683: [code] wrong translation (skalpa/ryuji+gi\_joe)  
Fixed snooty bug due to language specific characters (Onokazu)  
Fixed a bug preventing deletion of users from the admin user search results (Onokazu)  
Fixed a bug preventing deletion of admin users (Onokazu)  
Fixed bug #915976: module onInstall feature doesn't display module messages correctly  
(skalpa/feugy+dave\_l)  
Fixed bug #898776: Xoops module resolution for <http://www.host.com> and host.com (wulff\_dk)  
Fixed bug #906282: XoopsGroupPermForm::render() - throws Undefined variable (mithrandir)  
Fixed bug #946621: Comments system extra\_param not working with register\_globals off  
(mithrandir/gstarrett)  
Fixed bug #932200: Admin > Edit user shows wrong username (mithrandir)  
Fixed bug #936753: \$xoops\_module\_header not in all themes (w4z004)  
Fixed bug #921930: SQL queries with leading whitespace don't work (mithrandir)  
Fixed bug #920480: xoops\_substr always adds three dots (skalpa)  
Fixed bug #921448: Undefined variable in xoopscodes.php (skalpa/dave\_l)  
Applied patch #953063: js Calendar first popup date bug fix (mithrandir/venezia)  
Applied patch #953060: xoopstree.php selbox - subcategories not ordered (mithrandir/venezia)  
Applied patch #928503: Only show search results for modules with granted permissions  
(mithrandir/malanciault)  
Fixed bug #922152 preventing notifications to work with some Windows configurations  
(skalpa/robekras)  
Fixed bug #930351 preventing XoopsThemeForm::insertBreak() to work  
Corrected the content of \$xoopsRequestUri on IIS fixing bug #895984 (skalpa)

The XOOPS Core Development Team is pleased to announce the release of XOOPS 2.0.7. This is mainly a "bug fix" release which addresses numerous issues reported since 2.0.6, and includes **two important security related fixes**. Therefore it is highly recommended that all 2.0.X users upgrade to this version.

The release packages can be downloaded from the sourceforge servers:

- [XOOPS 2.0.7 full package](#).
- [XOOPS 2.0.6 --> 2.0.7 update](#).

This is the re-release of the 2.0.7 package. Those who already upgraded to 2.0.7 before need only to update include/common.php and add the html/upgrade/xoops\_206\_to\_207.php file.

### !!EXTRA UPGRADE INSTRUCTIONS!!

Please apply the patch as usual, overwriting the original files with the ones from the patch.
