There are many modules in development over at the XOOPS Dev Forge Site, and there are several Help Wanted postings for developers to join the module dev teams.

These positions are volunteer of course, and most if not all of the open positions are for PHP or SQL developers. If you think you have what it takes, Apply to join the Dev Site and then apply for the job posting.

This is a good opportunity for those of you looking to give back to the Xoops Community!

Thanks. 😃
