Release Candidate 1 for FlashGames for Xoops has now been released! This is the one and only officially pnFlashGames supported arcade for the Xoops CMS. That means that you can download and install any game from pnFlashGames.com and use it in your Xoops arcade! This includes more than 150 high score saving free games as well as a fantastic selection of professionally developed and reasonably priced games available in our store.

In case you did not know, pnFlashGames is the premier high score arcade for PostNuke. The pnFlashGames module for PostNuke has been around for almost two years and has a huge following in the PostNuke community with an estimated 10,000 installations worldwide. The selection of free and commercial games grows every week thanks to a huge and healthy community on pnFlashGames.com.

Many thanks to Oliver Kaufhold from TipsMitGrips.de for making this great port. German support can be found at <http://tipsmitgrips.de>. English support at <http://pnflashgames.com/xoops>. Games can be downloaded from <http://pnflashgames.com>
