German Wireless LAN Security Portal - YAXS

NEWS_PDF_AUTHOR: sgofferj

NEWS_PDF_DATE: 2004/7/1 16:37:32

After quite a while, my projecthttp://www.sicheres-funknetz.de/ is back online.
Founded in 2002 and originally based on PHPNuke, the site deteriorated heavily after I left my former employer. Now, after a hard struggle, I managed to take the domain over and relaunched the project, based on XOOPS.

http://www.sicheres-funknetz.de/ is a dedicated German community portal on wireless lan security. As there wasn't any central German-speaking ressource about this topic, this project was founded.
