Hi, hyperpod.net is a new XOOPS based portal for designers, programmers, and developers of multimedia.

The site has just been launched and we are looking for quality registered users!

To kick off the site launch we are having a XOOPS Theme Design Contest. We invite all XOOPS theme designers to create a theme for hyperpod.net that other XOOPS users might be able to use as well.

Also, if you have any articles or news send them in!

Become a member to be notified of new developer articles and news.

Cheers!

Hope you can join the party!
