Hi,

I'm proud to present my new theme for my site. This one I don't release for public (sorry). But what I want to ask you is, can you check the theme with other browsers, resolutions etc. (i've tested it fully with 800x600 and 1024x786 with Internet Explorer 6). So if you find any bugs please report them to me and if you know the prob and how to fix it, I appreciate if you tell me.

Thanks,

Best Regards,
Gilian Keulens
