Hello to all:

This website is a community for parents discussing topics about their preschool children, including education, health, and share the fantastic pictures with others.

happybb.info

This is my first effort in Xoops. I have experiences in managing myphpnuke powered site for 2 years. Now I realized that Xoops suits me best and I cannot help but established a new website, of course, xoops powered.

The language of the website is Traditional Chinese.

I'd like to thank XOOPs developers and traditional Chinese support team who made this website possible.

The URL is <http://happybb.info>
