

Language tool - Modules

NEWS_PDF_AUTHOR: kiang

NEWS_PDF_DATE: 2004/8/18 16:08:01

I've tried to find a module which could make the job of translation being more convenient. But now I make a poor one...

I hope this module could be better soon. But my programing skill is as poor as my English. So I registred a project in Module Dev Forge. Hope somebody could improved it before the improvement of my skill...😁

---0.02---

update

1. better support for the 'quote' problem
2. support multi-line language definition
3. remove comments after '//' from language files
4. you could find more colors...^||

todo

1. remove comments which included by '/'* and '*/'
2. transform the PHP syntaxs to the target language files besides 'define'
3. fix the 'quote' problem more, ex. mixed usage with double and single quote
4. let it be like a module more...
