

## XOOPS Reduces Development Time Dramatically - YAXS

NEWS\_PDF\_AUTHOR: lavaburst

NEWS\_PDF\_DATE: 2004/8/25 14:48:52

I created a new video games site using xoops!

<http://www.latestvideogames.com>

It updates the front page blocks dynamically with data from the users. So if a new video game comes out, and someone searches for it on the site, it will automatically appear on the front page if its new.

The video game data is kept fresh automatically using Amazon Web Services (AWS).

Using XOOPS2 I created this site in a matter of days.

XOOPS helped me to concentrate on the core applications for the site instead of having to worry about how I will build the user database this week. ;)

I'm looking for feedback about the site.
