With the merger of European Shoutcast Network and Shout2xs, EuroCast is born. EuroCast is a European shoutcasting station, bringing news, reports, shoutcasts and video streams from European Tribes competitions, expanding into other competition-filled games as well.

The new station needed a new site and XOOPS was chosen as the platform to build on. A custom-built module for managing events as well as News, Soapbox and Newbb 2 beta 3 bring the content to the visitor.
