Thanks to everyones favorite CMS, XOOPS, [webmaster-universe](#) has now gone live!

With webmaster resources, a link directory, articles, challenges and forums all with the access for user submissions, webmaster-universe shall build up one of the most comprehensive webmaster references online.

Thanks for the great CMS and hope to see people around! 🙏

On a side note there is also cheap banner advertising available while webmaster-universe gets started, from as little as \$4 USD for 10,000 impressions.
